

TECHNOLOGY ACCEPTANCE: LEGISLATION, REGULATION, COMMUNICATION AND SECURITY

ROOM F

8 OCTOBER 2021 | 14:30 - 17:00

A clear regulatory framework and a correct communication are fundamental conditions for the growth of a national hydrogen supply chain, in order to let companies invest and offer new technological solutions and end users use those technologies. This session will deepen the current regulatory framework focusing also on communication and training aspects.

CHAIRMAN **Marcello Romagnoli** - Associate Professor Engineering Department UniMore
